

Clarity Execution System (CES)

Turn strategic goals into measurable team execution.

.

Align teams. Drive accountability. Gain total visibility.

The Problem

Chaos isn't a workload issue — it's a clarity issue.

When clarity breaks down, teams struggle:

- Accountability fractures — no one knows what “done” looks like.
- Burnout & disengagement — constant reactivity drains emotional energy.
- Lowered quality & productivity — effort rises while progress stalls.
- Turnover & talent loss — people leave when the fog never lifts.
- Information silos — teams spend more time clarifying than executing.

CES eliminates the fog so teams can execute with confidence.

WHY CES

Because leaders and teams can't execute what they can't see!

CES gives leaders and Teams:

- **Instant clarity** — every task, owner, and priority visible...
- **Predictable execution** — no chasing, no guessing, no surprises.
- **Automatic management information** — reports with zero extra work.
- **A calm, controlled operating rhythm** — teams move faster, nothing is ambiguous

CES turns chaos into clarity — and clarity into execution.

Proof of Value

CES is built for real operations — not theory.

- Used by leaders to eliminate ambiguity.
- Reduces reactivity and emotional load.
- Improves execution quality.
- Strengthens accountability.
- Accelerates alignment.

See Advanced Manufacturing Demos

The Cost of Chaos

Chaos destroys execution long before effort does.

- People work hard but progress stalls.
- Leaders chase updates instead of leading.
- Teams operate in reactivity instead of rhythm.
- Quality drops because clarity drops.
- Emotional energy drains faster than workload.

Chaos isn't a people problem — it's a clarity problem.

Why Clarity Matters

Clarity is the foundation of execution:

- Clear tasks.
- Clear ownership.
- Clear priorities.
- Clear progress.
- Clear risks.

CES makes clarity automatic — not optional.

What CES Delivers

Clarity is the foundation of execution:

- **Better decisions, faster instant clarity.**
- **Predictable execution.**
- **Automatic reporting.**
- **A calm operating rhythm.**

CES gives leaders the visibility they need to execute with confidence.

Tasks Late To Plan

Organization	Responsible Person	Priority Task Category	Days Late To Plan	Objective	Status of Objective
Engineering					
Casey Stengel 36	High Strategic	-40	Improve design system utilized to define compressor aero.	Off Targets	
Who H. Knows 35	High Quality	-23	Study and recommended changes to compressor aero design predictions for efficiency and stall characteristics	On Targets	
Human Resources					
Daniel Lally 40	High Strategic	-4	Develop a plan to assure Butler's capability is adequate to comply with federal regulations regarding Hazmet Safety etc. The capability must be available by complete date stated below to support the predicted workload for last half of 2021 .	On Targets	
Manufacturing					
Joseph Gaines 19	High Cost	-17	Determine ROI by increasing capital expenditure for new machines to manufacture our "XYZ" product line.	On Targets	

Tasks Off Plan Value

Organization	Responsible Person	Priority Task Category	Days To Plan	Objective	Status of Objective
Engineering					
	Casey Stengel	High Strategic	-40	Improve design system utilized to define compressor aero.	Off Targets
Maintenance					
	Daniel Lally	Normal Strategic	16	Define a process that details the necessary tasks to assure Butler's equipment is up to federal safety standards and is in condition to operate on a 2 yr. project that starts 6 months hence. Gg	Off Targets
Manufacturing					
	Mark Rich	High Speed	-1	Complete a total process review to reduce time from product definition to product delivery by an average of 6 months.	Off Targets
	Yogi Berra	High Cost	7	Execute new contract for tool design services to achieve a 5% reduction in cost.	Off Targets
